

TISCA TIARA
mobility + textiles

**STEAM-PLEATED
CURTAINS**

READY-TO-FLY

ELEGANCE.

The curtains are steam-pleated, not stitched, and are therefore much more elegant.

EASY MAINTENANCE.

The curtains can be washed or dry cleaned while maintaining their excellent appearance since the pleats are a permanent feature and keep their shape and style.

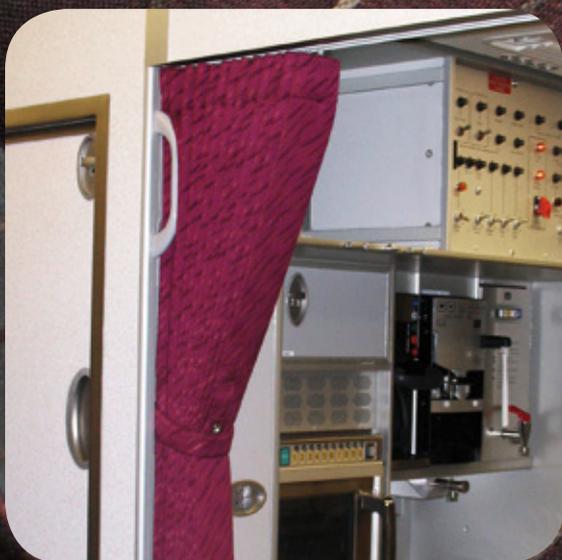

LONGEVITY.

Protection of your investment through superior quality curtains. Our high quality and craftsmanship ensure long lasting curtains.

CUSTOMIZATION OPTIONS

We produce customized curtain fabrics exactly according to your design, color and/or other specification

- Various pleat depths, sizes and styles
- Various curtain glider and hook systems for easy installation
- Various types of snap fasteners

- Single, double or multiple layer curtains
- Unlimited selection of curtain fabrics in any design and color; customized produced or chosen from stock

MORE BENEFITS

- **Airworthiness compliant:** The curtains are permanently and inherently flame-retardant with low smoke&tox characteristics (FAR / EASA CS 25.853, ABD0031)
- **Ready-to-fly:** We deliver ready-to-install curtains.
- **One stop shopping:** As the only producer in the world, TISCA TIARA first weaves the curtain fabrics and then processes them to steam-pleated, ready-to-install curtains – all under one roof without the need of subcontracting to other companies, resulting in significant cost and time benefits for our customers.
- **Stock program:** We maintain a very extensive stock program with over 1'500 items of curtain fabrics in all sorts of colors, patterns and qualities ready to ship!
- **Short lead time:** Thanks to our stock program we have the ability to serve our customers with steam-pleated curtains within a couple of days only.
- **Light and noise absorbing:** In addition to regular aircraft curtains we also produce light-blocking and noise-absorbing curtains.
- **As a true all-inclusive manufacturer,** TISCA TIARA offers matching carpets and seat cover fabrics with our steam-pleated curtains; all designed, developed and produced under one roof, made in Switzerland.
